Subject:	seqeunce search for appliation 09/763,397 (corrected request)

I need a search of SEQ ID NOs: **2-25.** I realize that I am requesting a search of more than 10 amino acid sequences. This application appears to have allowable subject matter and I need all of the sequences searched before allowance. The sequences are very short peptides. There is no way to reduce the number of sequences to be run in this application because Applicant has recited all of the SEQ ID NOs in the pending claims. I also need interference searches of all of the SEQ ID NOs. (i.e. **2-25**) run. Please rush.

Thanks.

SORRY, I NEED SEQUENCES 2-25 RUN ALONG WITH INTERFERENCE SEARCHES!!!
